Confirmation

The rubber compound used for the production of consumer articles in contact with food:

Polymer:	EPDM
-----------------	-------------

meets in its composition of active substances:

The positive list for aqueous food according CFR 21 § 177.2600 FDA "Rubber Articles Intended for Repealed Use" of the Food and Drug Administration, USA.

The positive list for latty foods (also for milk and edible oils) according CFR 21 §77.2600 FDA "Rubber Articles Intended for Repealed Use", of the Food and Drug Administration USA.

Due to technically unavoidable conditions and/or application forms of of the raw materials, the elastomer compound may contain traces of materials, those correspond not above mentioned recommendations and guidelines.

In any case, therefore should take place the prescribed examinations of the final part.
